

Claims

1. Mobile electronic device, comprising a storage to store digital content and processor being configured to edit and change said stored digital content, characterized by a component to obtain data provided from a sensor, wherein said processor is configured to generate and/or process said digital content according to said obtained sensor data.
2. Mobile electronic device according to claim 1, further comprising a communication device.
3. Mobile electronic device according to claim 2, characterized by a mailbox, wherein said digital content to be edited comprises an announcement message contained in said mailbox.
4. Mobile electronic device according to claim 3, wherein said processor is configured to generate and/or process a basic announcement of said mailbox automatically according to said obtained sensor data.
5. Mobile electronic device according to claim 3 or 4, further comprising a text to speech transducer, to read out said announcement stored as a text data file.
6. Mobile electronic device according to claim 4, wherein said communication device is a mobile telephone.
7. Mobile electronic device according to anyone of the preceding claims, wherein said stored digital content comprises digital audio data.
8. Mobile electronic device according to anyone of the preceding claims, wherein said stored digital content comprises digital picture/video data.
9. Mobile electronic device according to anyone of the preceding claims, wherein said stored digital content comprises digital text data.
10. Mobile electronic device according to anyone of the preceding claims, further comprising a processor configured to evaluate said obtained sensor data.
11. Mobile electronic device according to claim 2, wherein said component to obtain sensor data comprises a receiver.

12. Mobile electronic device according to claims 2 and 7, wherein said component to obtain sensor data comprises at least one sensor built-in in said mobile electronic device.
13. Mobile electronic device according to anyone of the preceding claims, wherein said sensor is an acceleration sensor.
14. Mobile electronic device according to anyone of the preceding claims, wherein said sensor is a position sensor.
15. Mobile electronic device according to anyone of the preceding claims, wherein said sensor is an optical sensor.
16. Mobile electronic device according to anyone of the preceding claims, wherein said sensor senses atmospheric conditions.
17. Mobile electronic device further comprising a processor being configured to change device settings according to said obtained sensor data.
18. Mobile electronic device further comprising a user interface, for providing a user interface for manually overriding said generating/processing.
19. Method for generating/processing a digital content stored on a mobile electronic device in according with obtained sensor data, comprising
 - obtaining data from a sensor, and
 - generating/processing said digital content in accordance with said obtained sensor data.
20. Method according to claim 19, further comprising receiving a communication request.
21. Method according to claim 19 or 20, wherein said generated digital content is stored as an announcement file of a mailbox.
22. Method according to one of claims 19 to 21, further comprising evaluating said obtained sensor data, and wherein said generating/processing of said digital content is done in accordance with a result of said evaluation operation.
23. Method according to anyone of claims 19 to 22, further comprising receiving sensor data from an external sensor.

24. Method according to anyone of claims 19 to 23, further comprising transmitting of said changed digital content.
25. Method according to anyone of claims 19 to 24, further comprising changing of device settings in accordance with said sensor data.
26. Method according to anyone of claims 19 to 25, further comprising manually editing said digital content by user input.
27. Software tool comprising program code means for carrying out the steps of anyone of claims 19 to 26 when said program is run on a computer device or a mobile electronic device.
28. Computer program comprising program code means for carrying out the method of anyone of claims 19 to 26 when said program is run on a mobile computer or network device.
29. Computer program product comprising program code means stored on a computer readable medium for carrying out the method of anyone of claims 19 to 26 when said program is run on a network device or a mobile computer device.
